Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 January 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED OFFICE ACTION

Faxing of Responses to Office Actions

In order to reduce pendency and avoid potential delays, TC 3700 is encouraging FAXing or responses to Office Actions directly into the Group at (571) 273-8300. This practice may be used for filing papers, which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into TC 3700 will be promptly forwarded to the examiner.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. Claim 6 recites the limitation "downward" in line 7. It is not understood what direction is "downward", since applicant has not established the "up" and "down" direction.

2. Claim 7 recites the limitation "the open bottom" in line 7. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4-7, 11, 12, 18, 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Hillmer-Mann (5,364,199).

Hillmer-Mann discloses in Fig. 4, 9 and 10, a paper fastening arrangement for use with a fastener having a base (38) including two ends each having a leg (36a and 36b) extended therefrom, wherein the legs (36) are foldable relative to the base; a sheath (12, 14 and 16) comprising: an extension (12) shaped to slideably engage one of the legs (as seen in Fig. 3); the extension including an opening (20) that defines a cavity (82) to receive the leg; wherein the extension includes a solid portion which partially covers the leg over the opening (as seen in Fig. 10, when half (14) is folded over (12)) and is operative to engage (however, not directly) through sheet material (through the use of a second fastener (52 and 56, as shown in Fig. 3); at least one

foldable guide tab (14) depending from the extension; a retainer or retaining means (88) to slideably engage with the sheath for securing the sheath and leg; and wherein the sheath can also consist of more than one guide tab (70a and 70b as shown in Fig. 7).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hillmer-Mann.

Hillmer-Mann discloses a paper fastener arrangement comprising all the elements as claimed in Claim 1, and as set forth above. However, Hillman-Mann does not disclose wherein the sheath, the extension and guide are integrally formed.

In regards to **Claim 20**, it would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the fastening arrangement in one piece, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. Therefore, it would have been obvious to one having ordinary skill in the art, to construct the fastening arrangement in one piece or many pieces, since applicant has not disclosed the criticality of constructing in either a one unit piece

or many separable pieces placed together, and invention would function equally as well if made with any desirable number of pieces.

Allowable Subject Matter

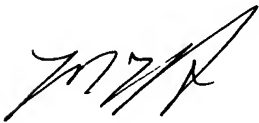

4. Claims 2, 3, 8-10 and 13-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Callander, Mathias, Waegemann, Innacelli, and Lynch disclose similar paper fastening arrangements.
